

Quick Installation – Joomla 2.5

1. Unzip the quickinstall zip file to your hard disk
2. Upload all files to your webserver directory
3. Open the URL where you have uploaded the files
4. If the content is uploaded in the main web directory, use <http://yourdomainname.com>.
5. In case you have uploaded it in a subdirectory, open <http://yourdomainname.com/example>. Replace the domain and the directory names with the corresponding ones for your web site.

- **You have to install the Sample Data**

Joomla! 2.5.6 Installation

Steps

- 1 : Language
- 2 : Pre-Installation check
- 3 : License
- 4 : Database
- 5 : FTP Configuration
- 6 : Configuration**
- 7 : Finish

Main Configuration

[Previous](#) [Next](#)

Site Name

Enter the name of your Joomla! site.
Optional:
You can also enter Meta Description and Meta keywords for your site.
You may also decide if the site frontend may be immediately available or not after the installation is completed.

Basic Settings

Site Name *

[Advanced Settings - Optional](#)

Confirm the Admin email and Password.

Enter your email address. This will be the email address of the Web site Super Administrator.
Enter a new password and then confirm it in the appropriate fields. You may change the default username **admin**. These will be the Username and password that you will use to login to the Administrator Control Panel at the end of the installation.
If you are migrating, you can ignore this section. Your current settings will be automatically migrated.

Confirm Admin Password *

Load sample data

Important! It is strongly recommended that new Joomla! users install the default sample data. To do this click on the button *before* moving to the next stage.

1. Sample data: Before leaving the installation, you can populate the site database with data. There are two ways to do this:

1a. Default sample data can be inserted. To

Sample Data set:

Installing sample data is strongly recommended for beginners. This will install sample content that is included in the Joomla! installation package.

ATTENTION:

After you have import the sample-data your actual **user & password** has been changed to:

User = admin

Pass = password

Please change that after first login
